

Assignment 14

→ Problem Statement :

Execute atleast queries on any suitable MongoDB database that demonstrate following :

- i. \$where queries
- ii. cursors
- iii. database commands.

→ Theory :

```
db.user.find(  
  { age : { $gt : 10 },  
    { name : ' ', address : 1 }  
  }  
  limit(5)
```

- a. Retrieve a document in ascending or descending order.

- `db.teacher.find().sort({id:1})`

1 : Ascending Order
-1 : Descending Order

b. Limiting query results

- `db.teacher.find().limit(2)`

c. Skipping some documents from collection in MongoDB

- `db.teacher.find().skip(3)`
-

→ Conclusion :

Topics Covered :

1. Conditional Queries
 2. Cursors
 3. Database commands.
-
